Two Styles Of Tray Denester to Choose From

The Model MS-7

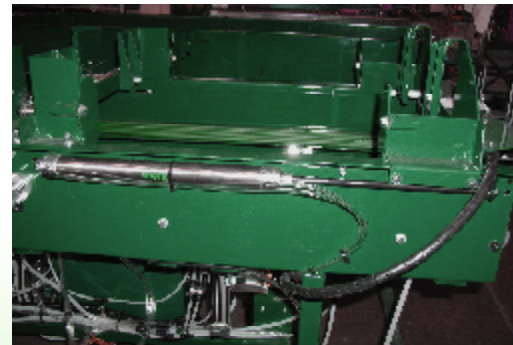

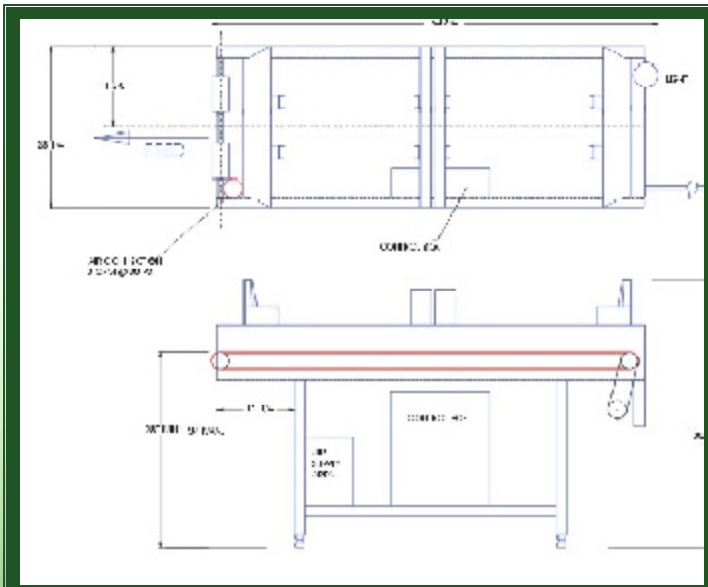

The Model MS-7 Is capable of running both standard and 60 X 40 (metric) tray sizes.

All Trays are oriented in landscape mode (perpendicular to the conveyor) This feature is more convenient for the modern packing facilities designed with wider conveyor systems capable of handling the 60 x 40 tray sizes.

The Model MS-6

The Model MS-6 Is capable of running both standard and 60 X 40 (metric) tray sizes as well.

Standard size Trays are oriented in landscape mode (perpendicular to the conveyor). 60 x 40 trays are oriented in portrait mode (parallel to the conveyor).

This machine was built to accommodate existing packing lines whose conveying systems were not initially designed for 60 x 40 tray sizes.
